Education

Vellore Institute of Technology
2023 - 2027
Bachelor of Technology - Artificial Intelligence and Machine Learning

India International School Jaipur
2022
High School Diploma, PCM

Relevant Coursework

- DSA - Operating Systems - Computer Networks - DBMS
- Object-Oriented Programming - Web Programming - Computer Architecture
- Artificial Intelligence - Machine Learning - Computer Vision - 3D Modelling
- Deep Learning - NLP - Compiler Design - Cryptography & Network Security

---

Experience

AI Intern - E-Cell, IIT Madras
Nov 2023 - Jan 2024

- Developed **Object Detection** and **Vision Transformer** models for image classification tasks using Python and deep learning frameworks.
- Applied machine learning concepts to real-world datasets and gained hands-on experience in computer vision workflows.
- Collaborated on AI-based solutions focused on practical model development and experimentation.

Design Lead, Gamedev Department - GDG on Campus, VIT Chennai
Jun 2025 - Present

- Led the successful “Game-A-Thon” 2025, overseeing end-to-end event operations, scheduling, and real-time leaderboard management.
- Designed and showcased two original games, facilitated broad participation and collaboration within the club.

- Coordinated with 30+ volunteers, boosting club's outreach by 30% and game dev member participation by 40%.

Game Development Member - GDG on Campus, VIT Chennai
Oct 2024 - Present

- Built in-house games, mentored peers in game design, and provided support for ongoing projects.

Event Management Member - Japanese Club, VIT Chennai
Aug 2025 - Present

Development Member - Microsoft Innovations Club VITC
Jun 2025 - Present

Organising Committee - Vibrance, VIT University
Feb 2025 - Mar 2025

Office Bearer/Member - NSS VIT Chennai
Aug 2024 - Present

- Increased volunteer participation by 40% through outreach and event initiatives.
- Participated in a 7-day NSS Special Camp focused on education, environmental awareness, and community service, including organizing student competitions, donating supplies, fitness sessions, anti-plastic rallies, and beach clean-ups.

President Science Club | Student Council - India International School Jaipur
Apr 2021 - Mar 2023

Projects

EduKnit | AI Platform (Finalist, Smart India Hackathon 2025)

- Selected as one of **top 20** software teams out of 864+ for **SIH 2025 Finals**.
- Built an AI-powered system to unify and verify student achievements, automate reporting, and improve accreditation workflows.

Nyaya | AI Legal Research Engine **(3rd Place, Smart India Hackathon 2024)**

- Developed an AI-powered research engine designed to streamline legal research for commercial courts by aggregating legal data, extracting key principles, and delivering relevant insights for faster, efficient dispute resolution.

Research Paper Chatbot

- Built an AI-powered research assistant using **Next.js, TypeScript, OpenAI API, and PDF parsing** to summarize and answer questions from research papers.
- Implemented PDF upload support, HTML extraction, streaming LLM responses, and conversational querying using server-side actions.
- Developed document-processing workflows using **pdf-parse, jsdom, and OpenAI SDK integrations.**

Pet Adoption System

- Developed a full-stack adoption platform **using Node.js, Express.js, MongoDB, and REST APIs**.
- Implemented pet registration, adopter management, and database integration using Mongoose.
- Designed backend workflows and tested API functionality for real-time adoption management.

Vision Transformer & Object Detection

- Built as part of an AI internship, applied advanced deep learning models for image classification and real-world object detection.

RESEARCH

From Text to Traffic: Repurposing Frozen Generative Models for DDoS Detection *(Ongoing Research)*

- Exploring the use of frozen Large Language Models for **zero-shot DDoS** attack detection across unseen network protocols.
- Proposed an architecture combining temporal flow tokenization, localized sequence normalization, and attention-based pooling for network intrusion detection.
- Investigating scale-invariant reasoning techniques for cross-protocol cybersecurity analysis using deep learning methods.

Certifications

Microsoft Certified: Azure AI Fundamentals (AI-900) - Microsoft
Score: **828/900**. Topics: AI Workloads, ML Concepts, Computer Vision & NLP, Generative AI on Azure.

SC-100: Microsoft Cybersecurity Architect Expert Certification: ongoing

E**ntrepreneurship Program** - Coincent
Completed: Gained experience in innovation, leadership, and business fundamentals.

Key Achievements

- **Top 3** at VITISH'24, Smart India Hackathon 2024
- Finalist, Smart India Hackathon 2025-EduKnit project selected in **top 20** from 864+ teams.
- Organized & led major campus events; NSS contributor and **active leader & public speaker.**

Technical Skills

Languages: Python, C, C++, Java, JavaScript, TypeScript, HTML, CSS, SQL, PL/SQL, Next.js
Frameworks/Tools: React, Node.js, Git, Blender, Figma, SQL/NoSQL, 2D/3D Modelling
Domains: Artificial Intelligence, Machine Learning, Deep Learning, Natural Language Processing, Cryptography, Full-Stack-Development, Computer Vision, Game Development, Event Management

---

Leadership / Extracurricular

- Design Lead, **Google Developers Group** on Campus - GameDev Department of VIT Chennai
- Development Member, **Microsoft Innovations Club** VITC
- Event Management Member, Japanese Club VIT Chennai
- Organising Committee, Vibrance VIT
- President, Science Club - India International School Jaipur

---

Languages

English (Advanced), **Hindi** (Advanced), **French** (Beginner), **Japanese** (Intermediate)
